WARE FOR BATH

Patent Number: JP56013076
Publication date: 1981-02-07
Inventor(s): NAKAMURA KENJI
Applicant(s): NAKAMURA KENJI
Requested Patent: ☐ JP56013076
Application: JP19800061920 19800510
Priority Number(s):
IPC Classification: C02F1/00; A47K3/00; A47K5/00
EC Classification:
Equivalents: JP1149662C, JP57028310B

Abstract

PURPOSE: Ware for bath which consists of a float and a perfume containing body provided with hole parts below the same and which is also provided with the function of successively dissolving aromatic agents, medicines, cosmetics, etc. into bath water while easily removing the suspended contaminants in the bath water.

CONSTITUTION: A containing body for perfumes, cosmetics, medicines is formed by screw-fitting or insert-fitting to part of a molding which is a synthetic resin foam molding of PE or the like formed with a hollow part and has a floating function. Fine hole parts are provided to this containing body to enable bath water to go in and out through said fine hole parts. At the same time, a raw material having an oily adsorptive capacity A is disposed on the surface of the floating body. As an example of this ware for bath, it is made by e.g. injection molding of synthetic resin, and a partition plate 2 is bonded 3 to its top cover 1 to hermetically form a hollow 4, after which the bottom cover 7 having fine holes 6 is mounted by way of a fitting part 5. Aromatic agents, medicines, cosmetics 8 are put in the inside of the lower cover 7 to become a containing body, whereby the ware for bath is formed.
